Interact-TV Unveils the T2 Media Server with Over 2 Terabytes of Media Storage

Westminster, CO., March 26, 2007 – [Interact-TV](#)™ (OTC: ITVI), a leading developer of Linux-based Home Entertainment Servers, today unveils the [T2 Media Server](#), a new generation of Linux Media Center that includes high-definition 720p Component video output, all new MPEG2 video encoding, and over 2.25 Terabytes of media storage in one compact device ideal for any stereo cabinet, entertainment center or home theater.

Starting from \$2495, T2 delivers all the features and functionality consumers have come to expect from a [media server](#) including a subscription-free PVR, complete Video Library with integrated [DVD server](#) and cover art navigation, Music Library with integrated [audio server](#) and Lossless Audio Encoding, Photo Library and more. T2's two terabytes of storage means that consumers can now save up to 450 DVDs and still have room for hundreds of recorded programs and thousands of music CDs and digital photos.

"The T2 Media Server from Interact-TV delivers the next level of media storage for consumers with expanding DVD and Music libraries," said Ken Fuhrman, CTO of Interact-TV. "The T2 is ginormous but its price point is not, making it affordable for a consumer with over 400 DVDs in their media collection."

About Interact-TV Inc.
