## Interact-TV Unveils TellyRAID — 2 Terabytes of Digital Media Storage for Unparalleled Protection of Home Media Libraries

**Westminster, CO., June 12, 2006** – Interact-TV™ (OTC: ITVI), a leading developer of Linux-based Home Entertainment Servers, today unveils TellyRAID™ with 2 Terabytes of protected, high performance digital media storage. TellyRAID is a compact, pedestal NAS (Network Attached Storage) device that plugs anywhere into the home network. TellyRAID communicates with Interact-TV's award-winning Telly Home Entertainment Servers®, TellyVizion™ Playback Units and all other networked computers.

TellyRAID, comprising an array of 4 high-capacity hard drives, serves as the main depository and access point for all digital media content (photos, music, movies etc.), the digital media database and all metadata. TellyRAID has enough performance to handle multiple HD or DVD streams and is compatible with all Telly features.

Through redundancy, TellyRAID provides protection for media and information stored on the array. The data can even withstand complete failure of one hard drive (or sometimes more) without any loss of data and without requiring restoration of any data from backup. As larger hard drives become available and media collections grow, consumers can add larger hard drives to expand capacity easily, without ever reformatting the volume. TellyRAID is based on ReadyNAS™ from Infrant Technologies. No other NAS lets consumers expand storage capacity so easily.

Using TellyRAID with Interact-TV's Telly Home Entertainment Servers or TellyVizion Playback Units, consumers can bring media up to the main home theater or any TV in the house to watch or listen in high definition.

“TellyRAID ensures that consumer's media library is protected and secure,” said Ken Fuhrman, CEO of Interact-TV. “Interact-TV is focused on delivering solutions that let our customers maintain extensive media libraries *and* peace of mind. TellyRAID, starting at \$2200 for 2 Terabytes, is an affordable solution for consumers who want secure, reliable and expandable storage for their digital media library.”

### **About Interact-TV Inc.**

Interact-TV Inc. designs innovative products that empower the digital entertainment experience, creating an easy way to access, organize, share and enjoy ever-expanding libraries of movies, music and photos. The complete Telly product line is available directly from the manufacturer's online store at <http://www.buyatelly.com> and from a growing network of dealers throughout North America.

Headquarters for Interact-TV are in Westminster, Colorado. Find more information at [www.interact-tv.com](http://www.interact-tv.com).
